Type of scheme	An Open ended Equity Scheme			
Investment Objective	The objective of the scheme would be to provide investors with opportunities for long-term growth in capital along with the liquidity of an open-ended scheme through an active management of investments in a diversified basket of equity stocks of domestic Public Sector Undertakings and in debt and money market instruments issued by PSUs and others			
Asset Allocation Pattern	Instruments	As % of Net Asset*		Risk Profile
		Min	Max	
	Equity and equity related instruments covered under the universe of PSU Companies including derivatives	65	100	Medium to High
	Debt and Money Market Securities	0	35	Low to Medium
	<p>* Exposure to derivatives instruments in the scheme may be to the extent of 50% of the net assets. Combined gross total exposure of debt (excluding CBLO/repo) + equity + derivatives (gross notional exposure) shall not exceed 100%.</p> <p>Exposure to securitized debt may be to the extent of 20% of the net assets.</p>			
Investment Strategy	<p>The primary strategy of the scheme would be to invest in the stocks of the PSU companies. The scheme would endeavor to identify market opportunities and at the same time would sufficiently diversify its equity portfolio and control liquidity risks and non-systematic risks by selecting well researched stocks which have growth prospects on a long and mid-term basis in order to provide stability and possibility of returns in the scheme</p> <p>Investment in equities would be done through primary as well as secondary market, private placement / QIP, preferential/firm allotments or any other mode as may be prescribed/ available from time to time.</p>			
Risk Profile of the Scheme	<p>Mutual Fund Units involve investment risks including the possible loss of principal. Please read the SID carefully for details on risk factors before investment. Scheme specific risk factors are summarized below:</p> <ol style="list-style-type: none"> SBI PSU Fund would be investing in equity & equity related instruments, debt and money market instruments (such as CBLO or as defined by SEBI regulations, term/ notice money market, repos, reverse repos and any alternative to the call money market as may be directed by the RBI). The liquidity of the scheme's investments is inherently restricted by trading volumes and settlement periods. In the event of an inordinately large number of redemption requests, or of a restructuring of the scheme's investment portfolio, these periods may become significant. In view of the same, the Trustees have the right in their sole discretion to limit redemptions (including suspending redemptions) under certain circumstances. Equity and equity related instruments risk: Equity instruments carry both company specific and market risks and hence no assurance of returns can be made for these investments. Debt & Money Market instruments risk: Debt & Money market instruments carry risks factors such as trading risk, credit risk, counterparty risk, liquidity risk, interest rate risk & reinvestment risk. Securitized Debt risk: Securitized Debt carry risks factors such as Liquidity risk, Limited Recourse, Delinquency and Credit Risk, Risks due to possible prepayments & Bankruptcy of the Originator or Seller. Derivatives risk: Derivative products are leveraged instruments and can provide disproportionate gains as well as disproportionate losses to the investor. Execution of such strategies depends upon the ability of the fund manager to identify such opportunities. Identification and execution of the strategies to be pursued by the fund manager involve uncertainty and decision of fund manager may not always be profitable. No assurance can be given that the fund manager will be able to identify or execute such strategies. Derivative instruments also carry liquidity risk, counterparty risk etc. 			

Key Information Memorandum

	<p>f. Risk associated with Stock lending: There are risks inherent to securities lending, including the risk of failure of the other party, in this case the approved intermediary, to comply with the terms of the agreement. Such failure can result in the possible loss of rights to the collateral, the inability of the approved intermediary to return the securities deposited by the lender and the possible loss of any corporate benefits accruing thereon.</p> <p>g. Risk of Investment Strategies: As the scheme would be primarily investing in the stock of PSU companies, so any government policy which will have an impact on the Public Sector Undertakings, will impact the performance of the fund also.</p>
<p>Risk Control</p>	<p>Investments in equity and equity related securities and debt securities carry various risks such as inability to sell securities, trading volumes and settlement periods, interest rate risk, liquidity risk, default risk, reinvestment risk etc. Whilst such risks cannot be eliminated, they may be mitigated by diversification and hedging.</p> <p>In order to mitigate the various risks, the portfolio of the Scheme will be constructed in accordance with the investment restriction specified under the Regulations which would help in mitigating certain risks relating to investments in securities market.</p> <p>Further, the AMC has necessary framework in place for risk mitigation at an enterprise level. The Risk Management division is an independent division within the organization. Internal limits are defined and judiciously monitored. Risk indicators on various parameters are computed and are monitored on a regular basis. There is a Board level Committee, the Risk Management Committee of the Board, which enables a dedicated focus on risk factors and the relevant risk mitigants.</p> <p>For risk control, the following may be noted:</p> <p>Liquidity risks:</p> <p>The liquidity of the Scheme's investments may be inherently restricted by trading volumes, transfer procedures and settlement periods. Liquidity Risk can be partly mitigated by diversification, staggering of maturities as well as internal risk controls that lean towards purchase of liquid securities.</p> <p>Concentration Risk:</p> <p>The scheme would be investing across PSUs and would endeavour to have an optimum degree of diversification across sectors and market capitalization ranges in order to mitigate Concentration Risk.</p> <p>Interest Rate Risk:</p> <p>Changes in interest rates affect the prices of bonds as well as equities. If interest rates rise the prices of bonds fall and vice versa. Equity might be negatively affected as well in a rising interest rate environment. A well-diversified portfolio may help to mitigate this risk. Further, the Scheme may use Interest rate derivatives to mitigate the interest rate risks and rebalance the portfolio.</p> <p>Political/Government Policy Risk:</p> <p>Changes in government policy and political decision can change the investment environment. They can create a favorable environment for investment or vice versa.</p> <p>Volatility risks:</p> <p>There is the risk of volatility in markets due to external factors like liquidity flows, changes in the business environment, economic policy etc. The scheme will manage volatility risk through diversification across companies and sectors within PSUs. The scheme may also use derivatives for the purpose of hedging in volatile markets.</p>
<p>How this scheme is different from the existing schemes of SBI Mutual Fund</p>	<p>SBI PSU Fund is a thematic fund focusing on investment in Public Sector Enterprises. As the reform process progresses over the next five to ten years, PSUs are likely to emerge as more robust and vibrant players in different parts of the economy. Despite large-scale privatization across the world, public enterprises remain an important aspect of the economic activity in varying degrees. SBI PSU Fund is unique in its own as it provides more coverage with respect to the industry. Nearly every industry has a Big PSU comprising the</p>

	<p>major part of that industry. The various industries which fall under PSU category are:</p> <ul style="list-style-type: none"> • Essential infrastructure goods and services • Exploration and exploitation of oil and mineral resources • Technology development • Building of manufacturing capabilities <p>Through this fund the AMC endures to invest in the stocks and capitalize on the in stored value of disinvestment or divestment which tends to improve price discovery, valuation and liquidity for such stocks. PSU companies have more management accountability and integrity which in turns minimizes the risk taken by them. The concept of Navratna's and miniratna's has introduced to seek more financial and operational autonomy along with the low risk factors. Thus the exposure in this sector makes it very different from other equity fund by the virtue of attributes explained above.</p> <p>Following is the investment objectives / strategies of various equity schemes presently being managed by SBI Mutual Fund:</p>
