Key Information Memorandum and Application Form

Name of the Scheme : Canara Robeco Large Cap+ Fund

Type / Category : An Open Ended Equity Scheme

Investment Objective: The Investment Objective of the fund is to provide capital appreciation by predominantly investing in companies having a large market capitalization. However, there can be no assurance that the investment objective of the scheme will be realized.

Asset Allocation Pattern of the scheme

Types of Instruments	Indicative allocation (% of Total Assets)		Risk Profile
	Minimum	Maximum	
Large Cap equity and equity related Instruments *	65	100	High
Domestic Debt and Money Market Instruments (including securitized debt upto 10% of AUM)	0	35	Low

*For the purpose of this Fund, Large Cap Companies are defined as those which are ranked from 1 to 150 on the basis of market capitalization at the time of investment. The ranking

will be reviewed on the basis of market capitalisation of companies at the end of every calendar quarter.

- Gross Notional Exposure by the Scheme in derivative instruments for the purpose of hedging and portfolio rebalancing shall not exceed 30% of the total Net Assets of Scheme.
- The stock lending done by the Scheme (if any) shall not exceed 25% of the net assets of the Scheme as on the date of such lending. Intention to lend securities shall be in accordance with the guidelines on securities lending and borrowing scheme issued by SEBI from time to time.

Total of investments in Equity, debt securities (including securitized debt), money market instruments and gross notional exposure in derivatives shall not exceed 100% of the net assets of the scheme

The scheme shall not make any investments in foreign securitized debt.

Investment strategy: Canara Robeco Large Cap+ Fund is named to reflect the investment strategy, which is mainly focused on a portfolio that would be concentrated on investing in any of the top 150 stocks ranked on the basis of the market capitalization.

Canara Robeco Large Cap+ Fund will have a distinctive feature in its investment process. This fund will use the inputs of the Robeco Emerging Markets Quantitative model ('REM Quant model') in its investment process as an Idea Generator. A Quantitative Strategy team will use a carve-out of the REM Quant Model to provide Canara Robeco with monthly

rankings based on a defined investment universe of large cap names. The model to be used is consistent with the REM Quant Model as used in Robeco Groep, Rotterdam. The ultimate decision will be made by the portfolio manager. The beta of the portfolio would be maintained at levels higher than 0.75. A carve-out of the Robeco Emerging Markets Quant Model for Indian universe has been back tested since 1995 and a portfolio based on investing in the top 20 percentile of stocks and not investing in bottom 20 percentile of stocks have outperformed the portfolio which invests in the total universe of stocks (60 stocks until December 2008 and 150 stocks from December 2008 onwards). As the model is to be used as an Idea Generator in the investment process for Canara Robeco Large Cap+ Fund these inputs may be valuable for the portfolio manager while constructing the final portfolio.

Scheme specific Risk Factors : Canara Robeco Large Cap+ Fund is an open ended equity fund investing in the top 150 companies by market capitalization and thus will carry less risk as compared to a mid cap / thematic equity fund. The underlying companies will be more liquid and also the access to information for these companies is very high as the Institutional ownership in these companies is generally large. The Fund will aim to have concentrated exposures in the stocks which are high conviction ideas and are fitting in the Fundamental and Quantitative Parameters. The value of the Scheme investments may be affected by factors affecting capital markets generally, such as price and volume volatility in the stock markets, interest rates, currency exchange rates, foreign investments, changes in government policy, political, economic or other developments and closure of the stock exchanges. Trading volumes, settlement periods and transfer procedures may restrict liquidity of investments in equity and equity related securities. Different segments of the

Indian financial markets have different settlement periods and such periods may be extended significantly by unforeseen circumstances. The length of the settlement may affect the Scheme in the event the Scheme has to meet large number of redemption. The Investment Manager perceives such situations to be exceptional in nature.

Risk Mitigation measures : Since investing requires disciplined risk management, the AMC would incorporate adequate safeguards for controlling risks in portfolio construction process. Stock specific risk will be minimized by investing only in those companies that have been thoroughly analyzed by the AMC. The AMC will also monitor and control maximum exposures to any one company/scrip to 5% over its benchmark weight, subject to an absolute per scrip limit of 10% of the AUM. This could be raised to 7% on a case by case basis by the investment committee.

Through adequate diversification of the portfolio, the AMC tries to reduce the risk. Diversification will also be achieved by spreading the investments over a diverse range of industries / sectors. The sector concentration would be limited to 7.5% active bet over benchmark sector weight.

The AMC will invest in sovereign/debt securities with short term ratings not less than CRISIL P1 or its equivalent. It will also invest in long term securities (long term ratings not less than CRISIL AA or its equivalent) with an unexpired maturity of less than 1 year.

The investments may be made in primary as well as secondary markets. As far as possible, the portfolio will be adequately diversified to reduce the risk of underperformance, arising out of unexpected security-specific factors.

Dividend Policy : The Scheme may distribute surplus, if any, by way of dividend/ as may be decided by the Trustees from time to time. If there is no distributable surplus or surplus amount is too small for distribution, in the opinion of the Trustees, the Dividend declaration may not take place. The Scheme is not assuring or guaranteeing any dividend or returns. Income Distribution, if declared, warrants will be issued within 30 days from the date of declaration of Income Distribution. The Income Distribution will be paid out of the Net surplus of the Scheme, to those unit holders whose names appear in the register of unit holders on the date to be notified for the purpose. Pursuant to payment of dividend, the NAV of the dividend option of the Scheme would fall to the extent of payout and statutory levy (if applicable). If AMC fails to pay the amount within 30 days, interest as specified by SEBI (currently 15% p.a.) will be paid to the investors from the expiry of 30 days till the date of dispatch of the dividend warrant.

Dividend Reinvestment : The unit holders have the option to reinvest the Dividend declared by the Scheme. Such unit holders opting to reinvest the dividend receivable by them shall invest in additional units of the Scheme. Upon exercising such option, the dividend due and payable to the unit holders will be compulsorily and without any further act by the unit holders reinvested in the Scheme. The dividends so reinvested shall be constructive payment of dividends to the unit holders and constructive receipt of the same amount from each unit holder, for reinvestment in units. On reinvestment of dividends, the number of units to the credit of unit holder will increase to the extent of the dividend reinvested divided by the first 'Ex-Income Distribution NAV' on the day of reinvestment as explained above.
